Prepare yourself for a pleasant surprise

This over-spec'd. saltwater spinning reel is full of features you'd usually pay much more to own:

- Powerful, cast gearing with a machined brass pinion for added smoothness.
- A smooth, wide-range multi-disc drag with super-slick friction washers for greatest range.
- A 48-stop anti-reverse system for the fastest possible no-slip hook sets.
- An over-long coil bail spring for the most positive action and the longest bail life imaginable.
- A forged aluminum spool to handle the highest pressure line loads.
- An oversized, soft-touch grip to make your hardest fish fight a "gripping" event.
- A forged aluminum handle for the strength necessary to drive this powerful reel.
- A computer-balanced rotor to ensure the only vibrations you feel come from somewhere near the hook.
- A unique, patented oscillation system to provide the smoothest line wind possible for both monofilament and braided line
- An extraordinarily strong main shaft support over 2.5 times longer than most other reels to prevent binding under extreme loads.

So what do these specifications do for you? Truth be told, they do nothing for you until you go fishing.

But when you do go fishing with this NLF reel, you'll find that these features give you a chance to fight harder, fight longer and fight with less fatigue. Fish hard. Fish safe. And have fun!

CARE AND MAINTENANCE

While we have done everything possible to make your NLF Saltwater Reel the highest value available, it remains a finely tuned piece of equipment that requires a minimal amount of care and maintenance. We congratulate you on your excellent choice of fishing equipment and recommend that you review the following maintenance suggestions; for the longest lasting pleasure with your tackle, we suggest adding these simple procedures to your regular fishing regimen.

BEFORE EACH FISHING TRIP

Carefully consider your choice of equipment. We all know that we cannot reasonably expect a small sports car to carry the local football team to its games; every car is designed for a certain purpose. In the same way, all fishing equipment is designed for a limited set of circumstances. For the greatest fishing performance, your choice of equipment should consider the type of fishing for which it will be used.

- Check that the line on your reel is fresh. Most lines tend to stretch and degrade over time and lose both their pull test and knot strength.
- Check that the reel has been cleaned, greased and stored properly with the drag slightly loosened.
- Check that the rod guides are all in good condition (no broken or loose rings).
- Check that the rod seat holds the reel securely in place

AFTER EACH FISHING TRIP

Clean both your rod and reel, lubricate your reel carefully, and back the drag off slightly before storing your reel. This is probably the most important recommendation for maintaining the longest working life of your reel and rod.

It is not necessary to submerge your reel in fresh water or hit it with a high-pressure blast of water. Few reels are dragged through mud or keel hauled behind a boat; therefore gently spraying your reel and rod with clean water after each fishing excursion and wiping them off thoroughly with a soft towel will take care of most cleaning requirements.

After cleaning, a light coating of a thin, high grade oil on all moving parts is recommended. While we strongly recommend using a competent service technician for maintaining the insides of your reel, we know that many folks who fish enjoy disassembling their reels both for fun and for maintenance purposes. To assist those who do disassemble their reel, the attached exploded drawing should help explain the parts and assembly of your NLF Reel, and to help if ordering parts is required.

ONCE EACH SEASON

If you properly maintain your reel and rod as recommended above, it is unlikely that you will ever need to send your reel in for service. Nonetheless, we recommend an occasional trip to a service center for a professional cleaning and service of your reel.

Service centers generally use better grades of grease and oil than most folks keep on hand, and it is very helpful to have a trained eye inspect your reel occasionally to make sure no unforeseen problems are developing.

If you follow the above recommendations, you should look forward to many enjoyable fishing experiences. Thank you again for your purchase of this outstanding NLF Reel.

PARTS SCHEMATIC

1. Spool washer
2. Spool click ratchet
3. Rotor nut-bearing
4. Rotor nut retainer screw
5. Rotor nut retainer
6. Main shaft
7. Rotor cover top screw
8. Rotor body
9. Line roller screw
10. Roller screw shield
11. Roller shield
12. Roller shim (2)
13. Roller bearing
14. Line roller
15. Bail wire assembly
16. Bail hinge
17. Rotor cover bushing (2)
18. Rotor cover (A)
19. Rotor cover bottom screw (2)
20. Bail spring pin bushing
21. Bail spring pin
22. Bail spring
23. Mainshaft screw

24. Silent A/R spring (2)
25. Rotor bushing
26. A/R transfer cam
27. A/R ratchet screw (2)
28. A/R ratchet (2)
29. A/R ratchet spring
30. Bearing retainer screw (2)
31. Rotor bearing
32. Pinion gear
33. Handle boss cover
34. Main body
35. Body plate screw
36. Body plate
37. Oscillation gear bushing
38. Oscillation gear
39. Oscillation block
40. Rear shaft support
41. Bail trip wire
42. Bail pivot
43. Rotor cover (B)
44. Drag knob assembly
45. Protective shield
46. Drag retainer spring

47. Top keyed washer
48. Teflon washer (2)
49. Eared washer (2)
50. Bottom Keyed washer
51. Carbon washer
52. Spool assembly
53. Spool shell
54. A/R switch cam
55. Switch cam spring
56. A/R switch
57. AR switch screw
58. Main gear
59. Main gear shim
60. Main gear bearing (2)
61. Sideplate
62. Sideplate screw (4)
63. Handle assembly
